Nice

I am satisfied with the current teaching methods, however strengthening feedback mechanisms such as organizing one on one mentoring sessions would help in better understanding students needs and addressing their concerns effectively.

They can provide students with more autonomy and not restrict them as this will provide them with more flexibility and creative space. They should understand the sentiments of the students and conduct engaging activities or fests that are more akin to the students' liking instead of limiting themselves to only educational programs. This will make the experience of the students more colourful and fruitful.

All good, nothing much will be improved beyond this, and this doesn't means a complete satisfaction.

To get more connected with teachers and students.

Amicable teacher - Student relation.

1. Concious effort to improve Interdepartmental collaboration
2. Keep lousy internal politics to yourself and keep the student out of it.
3. Encourage seniors to be more active so that can engage the juniors.
4. Stop overhyping the college rather than that let them experience it.
5. Encourage and motivate everyone to take part in events rather than scaring them .

.To reduce the workload given prior to any main event. Everytime a few is forced to do heavy work and rest rest.

.More field work for sociology students

Paying attention to the emotional and psychological health of the students

They are doing their best

Improve the field study and internship programs

Monitor the student and address the weakness and the solutions for solving it. Equity has to maintain properly.

There's a lot of work for teachers and so not all teachers are able to provide enough time for mentorship to students .

For students the field work and other such activities is an opportunity but it is all tightly packed , giving less time for students to involve in other activities and not getting enough time to plan and act.

Ensure that for sports and arts, a day is dedicated and no field work or other programs come on that day for participation of all students.

We have a good mechanism for conducting programmes in college, but at times it is observed that plannings or change in decisions for any event is done in the last moment creating unnecessary pressure for both students and teachers.

Identifying whether the works are being overburden to the students and it affects their overall performance

more empathetic approach to students, need to access everyone with no bias and equal privilege and need to focus on more strict attendance and actions

1. The students must be given enough time to complete their tasks
2. The students can be better assisted by the faculties to conduct programmes, especially when the student has no prior experience.
3. Innovative teaching techniques must be used to teach different papers as the engagement of individuals in the class is getting reduced.

Nothing

Open book exams, more assignments, writeup s and less exams. Less lectures and more discussions.

1. Give ample time after internships for the students to declutter and get organized.
2. Take up less activities so that it does not become a burden for the teachers as well as students.
3. Change the pattern of the internal exam model into university exam model.

No suggestion

Good

Effective interaction

Use of LCD screens can be minimized as it often cause headache and sore eyes and would help to be more attentive in class.
